## OSP LOOSE TUBE LITE ARMOUR FIBER OPTIC CABLE PRODUCT SPECIFICATION 48XXX74EEBSXNN

This document establishes the specifications for an outdoor, direct burial, armored single mode fiber optic cable, in a flooded loose buffer tube design. It contains test values for all-important mechanical, optical, and environmental parameters and as such, is the basis for all-incoming inspection and acceptance.

### 1.0 CABLE CROSS SECTION

### 2.0 OVERALL CABLE CONSTRUCTION

2.1 Buffer tube

High Modulus Polymeric material
Dimension: 2.8 mm . nominal.
Tube and fiber color code per EIA/TIA-598 or as specified by customer.
Filling compound: A non-toxic and dermatological safe antioxidant hydrocarbon based gel.
2.2 Dielectric Central strength member

Epoxy Glass Rod with an up-coat of polymer (if necessary per construction)
2.3 Cable Core

The cable elements are stranded around the CSM, using reverse oscillation.
Moisture Resistance: The interstices are flooded with a homogeneous, non-hygroscopic, non-conductive and non-toxic, dermal safe polyolefin based compound to prevent water ingress and migration of moisture through the cable core. Then a non-wicking and non-hygroscopic polypropylene tape is applied
longitudinally with a nominal $25 \%$ overlap.
Binder yarns are applied over the core tape.
2.4 Cable strength

Circumferential strength members are placed over the cable core and under the armor tape.
2.5 Steel Armor tape

Corrugated flexible steel with plastic coating for bonding to sheath. The armor of each length of cable shall be electrically continuous with no more than one splice allowed per kilometer of cable. The breaking strength of any section of an armor tape containing a factory splice joint, shall not be less than $80 \%$ of the breaking strength of an adjacent section of the armor of equal length without a joint.
A ripcord is applied under the armor tape.
2.6 Outer Sheath

UV Resistant Black Polyethylene
2.7 Cable Markings

Indent printed: CCT GROUP48, FIBER OPTIC CABLE, \# of fibers-SM, MM/YY (month and year of manufacture), TELEPHONE HANDSET SYMBOL sequentially meter marked. Special print as required by customer.
